Credit/Debit Card Authorization

You may keep a credit or debit card on file for payments via Ivy Pay, a credit & debit card processing service. Ivy Pay has several benefits:

- I am able to charge you for sessions without physically swiping a card.
- The service is secure and compliant with HIPAA standards for client confidentiality.
- Your credit or debit card information is stored with Ivy Pay, not in my files. I do not have access to your stored credit or debit card information.
- You can review past charges or payments on a text trail.

This service is simple to use:

- You provide a cell phone number, which I enter into an app along with a charge for the session fee.
 - Ivy Pay texts you a secure link leading to a page where you enter your credit or debit card information and approve the first charge.
 - For future sessions, I use Ivy Pay to charge the stored card; the app sends you a text informing you that I have done so. Charges are typically run the morning of your appointment
 - You will only be asked to enter your card information once (unless you wish to change the card) and you do not need to download an app or regularly interact with Ivy Pay.
- * *note: for initial sessions, your card may be charged in advance to reserve your appointment slot.

Agreement:

I give Alyse Freda-Colon permission to charge the agreed upon session fee for all future sessions and scheduled appointments via Ivy Pay at the following

Cell phone number: _____

Signature: _____

Date: _____
